SUMMARY

Computer Engineering graduate from Trakya University with a strong focus on Mobile Application Development. Experienced in building modern, cross-platform, and native applications using Flutter, Swift, and Kotlin, with specialized skills in integrating on-device AI (TensorFlow/OCR) solutions. Proficient in software architecture, RESTful API integration, and optimizing mobile performance. Passionate about writing clean, sustainable code and collaborating in agile teams to deliver user-centric mobile experiences.

TECHNICAL SKILLS

- **Languages & Mobile:** Dart, Swift, Kotlin, Python, JavaScript, C#, SQL
- **Frameworks & AI:** Flutter, TensorFlow (docTR), React.js, Node.js, Flask, .NET
- **Databases:** PostgreSQL, Firebase, CoreData, SQLite
- **Tools & Platforms:** Git, GitHub, Postman, Xcode, Android Studio, VS
- **Code Specializations:** OCR Integration, On-Device ML, Cross-Platform Development, UI/UX Design

WORK EXPERIENCE

Ateş Wind Power | İzmir, Türkiye Software Engineering Intern | October 2025 – November 2025

- **AI-Powered Receipt Scanning App (Mobile):** Engineered a mobile expense management solution using Flutter. Integrated TensorFlow (docTR) for on-device OCR, enabling users to scan receipts and automatically extract data, significantly reducing manual data entry.
- **License Tracking System (Web):** Built a full-stack web module using React (Frontend) and Node.js (Backend) to track and manage company software licenses.
- Collaborated with the team to implement RESTful APIs, ensuring seamless synchronization between the mobile app and the central database.

ESBAŞ (İzmir Free Zone Founder and Operator) | İzmir, Türkiye Software Engineering Intern | July 2024 – September 2024

- **Online Event Participation Module:** Developed a dynamic registration web module for corporate events using React and .NET.
- Refined the user interface (UI) to improve the registration flow, resulting in a more intuitive user experience for attendees.
- Gained hands-on experience in corporate software architecture and backend integration within a Microsoft ecosystem.

LEADERSHIP & COMMUNITY

- **Co-Leader – GDG On Campus Trakya University:** Contributed to technology initiatives.
- **Board Member – IoT Trakya :** Contributed to technology initiatives.

PROJECTS

Parollas - Secure Password Manager | React, PostgreSQL, Flask

- Developed a high-security web application for storing notes and passwords, implementing AES-256 encryption standards to ensure end-to-end data privacy.
- Designed a RESTful API architecture using Flask (Python) and managed persistent data storage with PostgreSQL.

Qbid - Silent Auction App | Flutter, Python (FastAPI)

- Developing a mobile application that allows users to bid on items and track silent auction processes (Currently in development).
- Building a high-performance RESTful API architecture using Python (FastAPI) on the backend.
- Implementing a user-friendly mobile interface using Flutter.

Handwriting Recognition App | Kotlin, Python (Flask), PostgreSQL

- Engineered an Android application capable of recognizing handwritten text by integrating a Python-based OCR backend.
- Utilized Kotlin for the native mobile interface and established secure communication with the backend server for image processing.

Akıllı Tebeşir | Flutter, Firebase

- Engineered a Flutter-based mobile application focused on educational technology for digitizing board notes, and successfully published it on the App Store.
- Integrated Firebase infrastructure for secure user authentication and real-time database management.

WordWar Online - Competitive Word Game | Flutter, In-App Purchase, AdMob

- Developed and published a mobile game on the App Store where users compete through word-building, featuring gamification mechanics such as leaderboards, post-match statistics, and a "Zen" practice mode.
- Established the application's monetization model by successfully integrating In-App Purchases (IAP) and AdMob advertisements.

EDUCATION

- **Trakya University – Computer Engineering** | Oct 2021 – June 2025

LANGUAGES

- **English:** Reading - B2 | Writing - B1 | Speaking - B2
- **Arabic:** Reading - B1 | Writing - A2 | Speaking - A2
